

Lawn Builder™

IMPROVES SOIL

Contains organic matter and wetting agent to revitalise soil

RICH IN ORGANIC NUTRIENTS

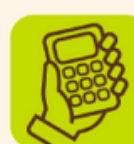

To encourage microbial and earthworm activity in the soil

LOW ODOUR

Uniquely formulated to include low odour composted manure

HOW TO USE

1. CALCULATE how much to use (see side of pack).

2. APPLY evenly to grass. Ensure granules are swept off hard surfaces.

3. WATER in thoroughly. You'll see visible green-up within 3 days of watering.

WATER SAVING TIP

During water restrictions, Lawn Builder can be applied without watering in. The formulation is safe on lawns until next rainfall when correctly and evenly applied with a spreader. Guaranteed to green the lawn within one week of obtaining moisture.

WHEN TO APPLY

Spring is the ideal time to feed your lawn. Resulting in a thicker, healthier, more robust lawn.

Autumn feeding will help repair summer damage and build winter resistance.

Early Summer feeding will keep your lawn green & build resistance against the summer heat.

Winter Boost. Lawn Builder liquid fertilisers are a great alternative to granular fertilisers.

For best results, feed three times per year.

2 MONTH SLOW RELEASE TECHNOLOGY

- ✓ **Stronger Lawn** Improves the lawn's ability to survive and recover during weather extremes.
- ✓ **Less Mowing** Nutrients are consistently delivered over 12 weeks, preventing surge growth.
- ✓ **No Burn, No Waste** Slow release eliminates the risk of burn damage and nutrient waste.
- ✓ **Better for our Waterways** Less nutrient run-off and leaching reduces freshwater contamination.
- ✓ **Cooling the Environment** Slow release builds a healthier lawn reducing temperatures compared to urban areas.

SUSTAINABILITY COMMITMENT

We support responsible sourcing and are consistently improving our product profile.
